1. TERMS AND CONDITIONS

BY COPYING OR OTHERWISE USING MFE SOURCE CODE FILES OR COMPONENTS, YOU AGREE TO BE BOUND BY ALL OF THE TERMS AND CONDITIONS OF THIS LICENSE AGREEMENT. Upon your acceptance of the terms and conditions of the License Agreement, you are granted the use of the source code or component in the manner provided below. The source code is the intellectual property of MFE and is protected by copyright law and international copyright treaty. Therefore, you must use this source code like any copyrighted material (such as copyrighted music, art, or books). Except as provided in the License Agreement, you may not transfer, rent, lease, lend, modify, translate, sublicense, time-share or electronically transmit or receive the source code, media or documentation.

1.A Modification Terms (for source code licenses)

The FlashStockChart™ ActionScript source code is licensed under a commercial source code license agreement. If you make changes to the Flash ActionScript source code, you are required to encrypt the .swf Flash files using a third party encryption library. We may encrypt the files for you for a fee or we may recommend an encryption utility that you may purchase. Once your files have been encrypted, you **must** send the files to support@modulusfe.com for inspection prior to publishing your files on the web. This process ensures that the source code will not be decompiled or viewed by unauthorized parties.

2. USAGE AND REDISTRIBUTION

YOU MAY NOT, UNDER ANY CIRCUMSTANCE, REDISTRIBUTE THE SOURCE CODE, THE **.SWF FLASH FILES** OR IN ANY WAY LICENSE THE PRODUCT ON MORE THAN ONE WEB SITE!

AGAIN: YOU MAY *NOT* REDISTRIBUTE THE **.SWF FLASH FILES** OR ACTIONSCRIPT SOURCE CODE, OR RUN THE SOFTWARE ON MORE THAN ONE WEB SITE. CIVIL AND/OR CRIMINAL PENALTIES WILL BE ENFORCED.

You may include the source in encrypted and COMPILED form (encrypted *.swf *.exe, and *.dll files). If you own a license to the product's source code, you may modify the source code to adapt it to your needs, however you may not redistribute the files or the modified source code. You are not allowed to redistribute any original or modified source code file or binary. You are not allowed to copy and paste source code into external classes. All source code is copyrighted and may only be used within the original classes!

You may not resell, rent, lease or distribute the source code OR compiled components alone, they must be distributed as a component of an application and bundled with an application or with the application's installation files. You may not call the source code or compiled components from a scripting language or wrap the component using a wrapper object (for this purpose, to "wrap" or use a "wrapper" means that in which an object is wrapped in other code as an interface between the caller, the MFE product, and the wrapped code. For example wrapping an MFE product and then redistributing that wrapped product as a programming tool similar to the original product is prohibited. You may not resell, rent, lease or distribute the source code or components in any way that would directly compete with MFE. All source code provided by MFE that is distributed with an application must be compiled or password protected to the extent that only the licensed software developer(s) may obtain access to it. Reverse engineering, reverse compiling, or disassembly of the Software is expressly prohibited.

3. DEVELOPMENT ENVIRONMENT

The development environment requires one (1) license per developer, and at least one license per client, company, or distributor.
